

Maryland Technology Development Center

STRATEGIC LOCATION

- In the heart of the nation's 3rd largest biotech cluster, along the thriving I-270 Technology Corridor – home to MedImmune, Human Genome Sciences and Otsuka America Pharmaceutical.
- Local research and academic resources provide critical support for growing a successful biotech or advanced technology company.
- Nearby resources include the National Institutes of Health, Johns Hopkins University, and the Center for Advanced Research in Biotechnology – a cooperative venture of the University of Maryland's Biotechnology Institute and the National Institute of Standards and Technology.

VIRTUAL INCUBATOR PROGRAM

A Virtual Incubator Program (VIP) is being initiated to provide support to local businesses not currently located in one of the County's Business Incubator Network facilities. The goal of the VIP is similar to that of the Incubator Network – facilitate the growth and success of young, County-based companies, thereby stimulating job creation to benefit the local economy.

VIP ELIGIBILITY

Interested participants must be currently based in Montgomery County and must submit a viable business plan. They must demonstrate how they will benefit from the VIP, including potential for local job creation.

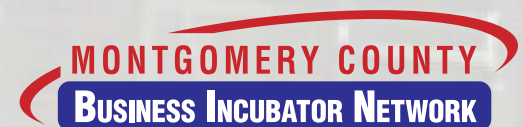

VIP RESOURCES AND BENEFITS

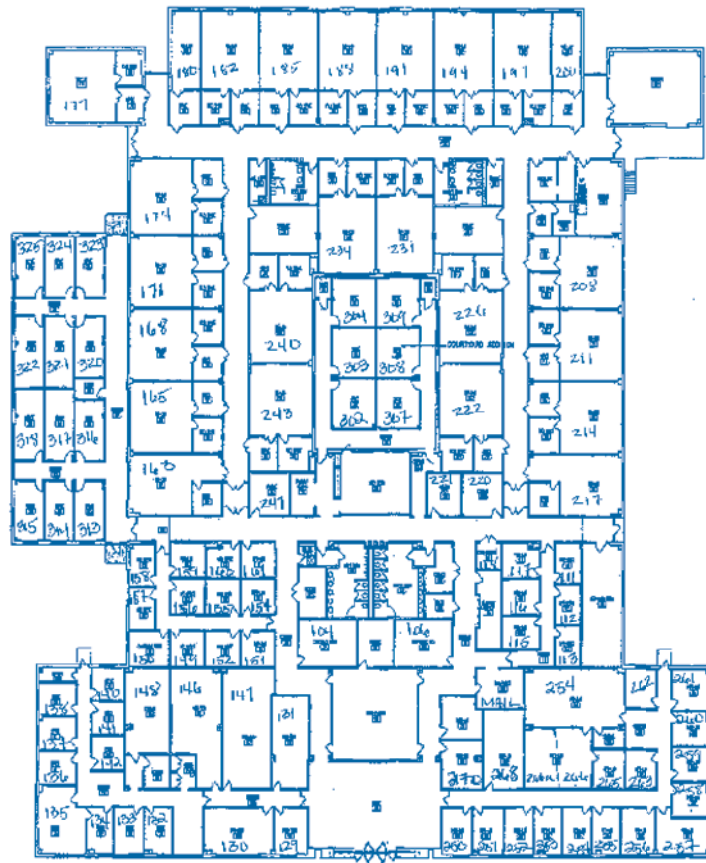

- Use of Network conference rooms, copiers, fax machines, mail boxes, etc.
- Attendance at weekly Network business educational and informational luncheons
- Access to all Network-related activities, mailing lists, website, etc.
- Support from Network staff including mentoring, linkages to targeted business programs, resources and networks, business plan review and guidance, referrals to a host of professional services, and more.
